

Gem Chandelier *Ring*

SALESHEET

Two sidereal collections are born from an imaginary journey To the Moon and Back. One is Gem, which is inspired by material purity and the magnetic force that envelops us as we walk on the lunar surface.

Made of stardust, soft and elongated gems are created in linear, circular and vertical compositions, like crystal sculptures.

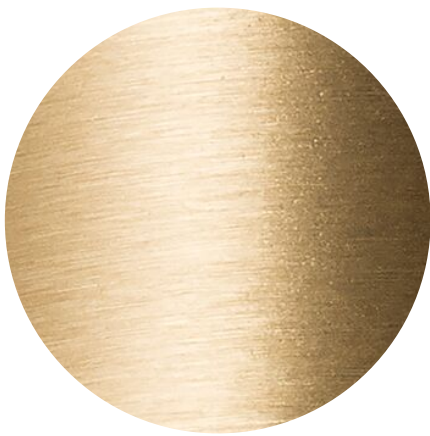

Thanks to the positioning of the gems and their particular texture, the light effect is subtly bright and soft, embracing the living space.

An innate flexible composition, with its brass stems that wrap themselves in a radiant circle. Different dimensions vary with the number of gems, made in hand-blown borosilicate glass with two glass finishings, the corroded one that recalls a white moon dust coating, and the nuanced one, where the white color fades into a pale opaline.

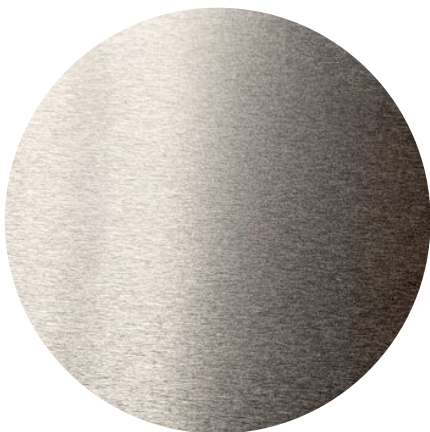

MATERIALS

HAND-BLOWN CORRODED OR MIST (WHITE-NUANCED) BOROSILICATE GLASS, HAND-FINISHED OR ELECTROPLATED BRASS.

FINISHES

BRUSHED BRASS
