

VIPP453+

Swivel chair

PRODUCT DESCRIPTION

Vipp has refined its Swivel chair by adding more comfort and new features that enhance its ergonomics and seating experience.

Named the Vipp453+ Swivel chair after its predecessor, Vipp presents an extra-padded, height-adjustable iteration of its renowned Swivel chair. Intended for home office and conference room settings where people sit for extended periods while working, the Vipp453+ chair offers a larger backrest and a highly comfortable seat.

Repeated from the original Swivel chair, the slender armrests continue straight into the discreet, padded backrest, giving the chair an almost airy expression despite its solid components.

Designed with an adjustable height position, the seat branches out into a five-legged base on either castors or floor gliders, allowing for a 360° seat rotation.

Vipp Vipp453+ chair is available in a selection of Vipp-curated leather and textile upholstery.

It is possible to upholster the Vipp Vipp453+ chair in specific Vipp hero upholstery as well as the customer's own fabric, however this service requires extended lead and production time. This service should be reviewed and approved case by case.

KEY SELLING POINTS

Extra comfort

A solid core surrounded by several layers of foam makes for a construction that is soft yet firm, ensuring comfort for people of all shapes and sizes. Compared to the original Swivel chair, the Vipp453+ chair features a larger backrest, adding comfort as well as balance to the enlarged seat.

Height adjustment

Designed with an adjustable height position the chair can accommodate various seating heights.

Tilt mechanism

The chair features a built-in tilt mechanism that automatically adjusts to the sitter's position, ensuring a smooth experience when moving in the chair.

In motion

Born from the original Vipp chair, the Vipp453+ chair is intended for the office and professional conference rooms that require extended seating time. Designed with a swivel base, this chair in motion will prove a flexible seating experience throughout the day.

Sit. Spin. Turn.

The soft seat rests elegantly on a pillar that branches out in a five-legged base on either castor wheels or floor gliders allowing for a 360° seat rotation.

Industrially Framed

The slender armrests continue straight into the discreet, padded backrest, giving the chair an almost airy expression despite its solid components.

Armrest height: From 65.5 cm / 25.8 in

PRODUCT MATERIALS
& SURFACE TREATMENT

Powder-coated or polished aluminium frame. Upholstery with leather or textile.

PRODUCT CHARACTERISTICS
& MAINTENANCE

Characteristics

Textile
The chair is made of dark sand textile and a polished aluminium frame. This combination works together to create a beautiful and warm appearance. The Vipp curated textile is made of 55% linen, 35% wool, and 10% nylon.

Leather
This chair is made of pure aniline leather and powder-coated or polished aluminium. The aniline leather is a very vibrant leather that might have natural marks on it, which is completely to be expected and accepted.

Maintenance

Textile
For daily cleaning, use a vacuum with a soft brush or wipe the upholstery with a clean, dry cloth. Use only very little water and not too warm. Be careful not to rub the seat, just wipe gently. For cleaning of the frame, use a clean, dry cloth.

Leather
In order to maintain the soft and supple quality of the leather, it is important to treat the aniline leather with a leather conditioner. It is important to keep leather out of direct sunlight as this can bleach and dry out the leather. Do not use chemical or normal cleaning products on leather, as this might destroy the leather, only aforementioned leather conditioner and cleaning. For daily cleaning, use a vacuum with a soft brush or wipe the leather with a clean, dry cloth.

TESTING & SUSTAINABILITY

Testing
EN 16139 - L2
ANSI/BIFMA X5.4-2020
Foam fire resistant according to BS 5852 (Crib 5) and CAL TB 117

Sustainability
Chrome-free leather.
